

UNITED STATES OF AMERICA

BE IT KNOWN that I, **DOMENIC COSENTINO**, of 191 Golden Gate Circle, Woodbridge, Ontario L4H 1N5, Canada, a Canadian citizen, have invented certain new and useful improvements in

of which the following is a specification.

OVERLAY TRIM MEMBER

[0001] The present invention relates to an overlay trim member which is operatively attached to, for example, the dashboard or other portion of an automobile, truck, recreational vehicle or as the case may be, in order to enhance the aesthetic appearance thereof.

[0002] An overlay trim member comprising a plate of, for example, wood veneer and of the appropriate shape and dimensions with the plate being operatively adhesively bonded in place is already known, and it is a primary object of the present invention to provide an improved form of overlay trim member which may be used to increase the enhancement of the aesthetic appearance of, for example, an automobile, truck, recreational vehicle or as the case may be.

[0003] In accordance with the present invention there is provided an overlay trim member comprising a main plate having at least one opening therein, and at least one insert plate which has a shape and dimensions corresponding to those of the opening and which is snugly disposed within the opening. The main plate and the insert plate are mounted on a backing member for attachment of the overlay trim member in place, and the material or finish of the insert member differs from that of the main plate.

[0004] In order that the invention may be more clearly understood and more readily carried into effect the same will now, by way of example, be more fully described with reference to the accompanying drawings in which Fig. 1 is a view of an overlay trim member according to a preferred embodiment of the invention;
